

# Key Investor Information

This document provides you with the key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## LF ASI Income Focus Fund, X Sterling Accumulation, a fund within LF ASI Investment Fund (ISIN: GB00BD9X6K29)

The fund is managed by Link Fund Solutions Limited, part of the Asset Services Division of Link Administration Holdings Limited.

### Objective and investment policy

#### Objective

The fund aims to provide a high level of income\* together with capital growth.

\*The fund manager will aim to achieve a yield higher than the average yield of the FTSE All Share Index over a 3 year rolling period. Investors should be aware that there is no guarantee that any specific level of dividend or yield will be achieved over any given time period

#### Investment Policy

The fund will invest predominantly in shares of companies listed in the UK and overseas with a focus on investments that provide dividends. The fund will be invested in a concentrated portfolio of securities.

#### Essential features of the fund:

- The fund has the discretion to invest in a range of investments as described above with no need to adhere to a particular benchmark.
- You can buy and sell shares in the fund every business day.
- Income from the fund will be added to the value of your investment.
- Derivatives may be used for investment purposes and to manage the risk profile of the fund.
- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money in the shorter term (e.g. less than 3-5 years).

### Risk and reward profile

- This indicator shows how much a fund may have risen and fallen in the past, and therefore how much a fund's returns may have varied. It is a measure of a fund's volatility. As the fund has less than 5 years price history, this calculation incorporates the volatility of an appropriate benchmark index. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.
- The fund has been classed as 5 because its volatility has been measured as above average.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time.
- Currency Risk: As the fund invests in overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- Counterparty Risk: As the fund may enter into derivative agreements there is a risk that other parties may fail to meet their obligations. This may lead to delays in receiving amounts due to the fund, receiving less than is due or receiving nothing.
- Financial Techniques Impact: The fund invests in derivatives. A relatively small movement in the value of the derivative's underlying investment may have a much larger impact, positive or negative, on the value of the fund than if the fund were to hold the underlying investment itself. Derivatives are also used to reduce risk by hedging against movements in the value of investments held by the fund.
- Concentration Risk: The fund will be invested in a concentrated number of stocks, which increases the possibility of the fund being more volatile over certain time periods than if it were invested in a more diversified portfolio.
- For full details of the fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' below.

## Charges for this Fund

The charges you pay are used to pay the costs of running the fund. These charges reduce the potential growth of your investment.
